The Farmer and His Needs

THE needs of the farming community have always received our careful and sympathetic consideration.

Many farmers with character and ability, but moderate capital, have received financial assistance from the Bank which has enabled them to achieve success in a way not otherwise possible.

As we have been able to help them, we may be able to help you. We invite you to call on our Manager and discuss your plans with him.

SPORT MEETING

At a meeting called on Monday May 29th to discuss Sports day. It was moved and carried that; Mr J. A. MacDonald take the chair. Wednesday June 21st be set aside for "Sports Day."

The following officers were elected.

Mr. J. J. Greenan, President,
John Atkinson, Vice-Pres., J. L. Thompson, Secy.-Treas.

COMMITTEES

Advertising

Messrs Coburn, Nash, Morrison.

Finance

Messrs Evans, L. Poxon, H.M. Thorburn.

Baseball

Messrs McLean, Hoding Shields

Grounds

Messrs McLeod, Shields, Francis Athletic

Messrs Braisher, McLean, Atkinson.

Auto Race

Messrs Muir, McNeil, Jealous.

Horse Racing and Bucking

Messrs Cunningham, C.C. Pope, Seale, Thos, Ramsey.

Boxing

Messrs Braisher, McCubbin.

It is requested that the various committees get together as soon as possible to arrange their events. A meeting will be called of the committees at an early date and it will materially assist, if a full report can be turned in by the members.

J. L. THOMPSON,
Secy. Treas.

JOHN GALLAGHER NOT GUILTY

John Francis Gallagher walked out of court a free man Wednesday night at 9:25, after the jury declared him not guilty. Gallagher was being tried a second time on a charge of having murdered John G. Coward at Carbon, Alta., September 28 last.

A tremendous roar of applause swept the crowd in the court room and the corridors when Charles E. Lane, foreman of the jury, announced the words that gave John Francis Gallagher, great war veteran, and one-time mounted police, his freedom.

Men leaped to their feet, cheering wildly and throwing their hats in the air.

"Hurrah for Gallagher," "Good old Gallagher," rang out voices high pitched with long suppressed emotion, and another cheer rang out.

"John Francis Gallagher, stand up. You are discharged. You may go now," said Chief Justice Harvey in formal dismissal.

Gallagher stumbled out of the prisoner's dock into the arms of his sister, who clutched him tightly in her arms, sobbing convulsively, but smiling bravely and happily through the tears of joy that streamed down her cheeks.

LOCAL NEWS

Mr and Mrs J. L. Thompson and Mr Cass spent the week end in Calgary.

The miners took the short end in a ball game with the town on Sunday afternoon, the score being 5-1. Mr L. Myers umpired the game.

Mr and Mrs Greenan motored to Calgary Monday.

Mr C. Burnette purchased a new MacLachlin car.

Harry Thorburn bought a Ford coupe.

A Baseball meeting was held in the Municipal Hall Friday May 26th, to decide what League Carbon would enter, it was finally decided that Carbon should enter the Rockyford League, instead of the Gamble one.

Mr J. Worth bought a Ford Roadster.

Mr Alfie Fraser spent a few days in Calgary this week.

Mr and Mrs Needham wish to thank the Ladies Aid for the present of a beautiful bouquet of flowers.

BORN: To Mr and Mrs Needham on Monday May 22nd a daughter.

Mrs J. Carr has returned from High River, after her long visit with her parents.

We promised you last week some thing new about the way the prostitutes are allowed in this little village. As we have been away till Thursday, we will take this matter up again next week and we will tell you who is who. We have communicated the whole matter with the authorities and if they don't act, we will at least let you know. We don't believe in prohibition, but we know that the respectable class in this village does not believe in prostitution.

The Canadian Constitution

Necessity, it has been said, is the mother of invention, and certainly the absolute necessity of Governments during and since the war period to find large revenues wherewith to meet heavy national expenditures and unprecedented interest charges led to the inauguration, if not invention, of new schemes and methods of taxation. During the war it was practically impossible to control expenditures, hence it was necessary to raise money by borrowings and through excessive taxation to cover such expenditures. This practice, then enforced upon Governments, has for too long a period been continued—Governments basing their revenue requirements upon their expenditures, instead of endeavoring to bring expenditures within the limits of their revenues.

More recently, however, attempts have been made to reduce expenditures. The Washington conference on armaments was a noteworthy attempt in that direction. In Great Britain remarkable economies have been recommended by the Geddes Commission, and steps are now being taken to put many of these into effect. In Canada, too, an earnest effort is being made to bring about reduction in national expenditures, instead of merely striving to devise new means of taxation and enlarged revenues. These are signs of a return to national sanity, because the road we were travelling was bound ere long to end in disaster. Municipal governments are likewise beginning to learn from past bitter experiences, and reductions in civic budgets are the order of the day.

There is, however, one field in Canada which would appear to offer an opportunity for harvesting a valuable crop of national economies and savings in expenditures, both Federally and Provincially, that is being neglected. Undoubtedly, politicians are somewhat loth to tackle it as once the question is opened to close investigation and expert study there is no telling what acute differences of opinion may develop throughout the country, or what really troublesome questions may call for answer and a solution. It is a case of leaving well enough alone no matter how bad that "well enough" may be.

We refer to the very large question of the increasingly apparent need for a revision of Canada's constitution as it is laid down in black and white in the British North America Act. During more than half a century of unparalleled change and progress throughout the world, there has been practically no amendment of any importance to the Canadian constitution. It still stands as it was written to meet the needs of 1867 and the future as it could be read by statesmen at that time.

The B.N.A. Act was the product of almost innumerable compromises, and unless these compromises had been effected at that time the Dominion would never have been brought into existence. But surely Canada has advanced sufficiently, and national sentiment developed to an extent, to warrant the hope that we have outgrown the need for many of the compromises effected to meet the local fears and jealousies of Provincial units and minorities in 1867.

With one of the heaviest per capita national debts in the world it is essential that Canada should enforce economies in administration and expenditure wherever it can be done without impairing the efficiency of the public services. And where it is possible to effect changes which will not only prove economical but add to efficiency in service and administration, surely it is the height of folly to neglect them merely because the path to reform may be strewn with difficulty.

After all no very great controversial questions need be involved in a consideration of quite a few subjects wherein there will be found to lie big opportunities for increased efficiency in public services at a very materially reduced cost to the country at large and relief to the over-burdened taxpayer. All that is required is courage, straight business sense, and some of that same grim determination and untiring patience which characterized Lloyd George in connection with the Irish negotiations and is again the outstanding feature of the International conference at Genoa.

There are anomalies, inconsistencies, and duplications in the British North America Act costing this country millions of dollars annually, which, if they existed in connection with any big industrial concern, would occupy the minds of the directors until they are removed and the problems which they present definitely solved.

Space available in this column will not admit of a discussion of all of these, but in next week's article attention will be devoted to a few of them as illustrative of what might be accomplished if the Leaders in Government at Ottawa and in each of the Provincial capitals would get together in a round table conference in a sincere effort to achieve much needed reforms.

How Colonel Saved Seemingly Hopeless Situation at Valcartier

"Someone has tampered with the pumps. We'll have no water supply, and four thousand men are arriving tomorrow!"

This was the message brought to headquarters at five o'clock in the afternoon of one of those strenuous days that marked the building of Valcartier Camp in August, 1914.

The situation seemed hopeless. There was no opportunity to get the stolen portion of the pumps under a delay of three days. Headquarters went to bed that night face to face with a water famine, and thousands of troops due to arrive in the next few hours.

When the camp awoke water was flowing freely from all the taps and outlets. Chug-chugging away, in the river, was a fine fire engine, the property of the city of Quebec.

Col. William McBain, one of the staff, had rushed to Quebec city, secured civic authority for the removal of the big fire-fighter, and on a special train delivered it to Valcartier and connected it up to the water system while the camp slept.

Just another little reason why Canada was able to send overseas in record time a division of real fighters.

By making your purchases from your home merchant you are contributing direct to the prosperity of the community in which you live.

Have You Stomach Risings, Gas, Heart Burn, Sourness? Tells of a Simple Remedy

It's really wonderful the quick relief you get from ten or twenty drops of Nerviline taken in sweetened water. For cramps and spasms, Nerviline is equally efficient. To safeguard yourself against these ailments, keep handy on the shelf a bottle of trusty old Nerviline. It will relieve the minor aches and pains of the whole family. Good for internal or external use. 35c at all dealers.

The orange was originally a pear-shaped fruit about the size of the common wild cherry. Its evolution is believed by naturalists to be due to 1,200 years of cultivation.

Dyed Faded Sweater, Skirt, Draperies In Diamond Dyes

Every "Diamond Dyes" package tells how to dye or tint any worn, faded garment or drapery a new rich color that will not streak, spot, fade or run. Perfect home dyeing is guaranteed with Diamond Dyes even if you have never dyed before. Just tell your druggist whether the material you wish to dye is wool or silk, or whether it is linen, cotton, or mixed goods. For fifty-one years millions of women have been using "Diamond Dyes" to add years of wear to their old, shabby waists, skirts, dresses, coats, sweaters, stockings, draperies, hangings, everything!

Queen Elizabeth of Belgium is to have—a specially designed airplane for her private use.

GLAD TO BE ABLE TO WORK

Toronto Woman Gives
Credit to Lydia E. Pinkham's
Vegetable Compound

Toronto, Ontario.—"I suffered with irregular periods, was weak and run down, could not eat and had headaches. The worst symptoms were dragging-down pains, so bad I sometimes thought I would go crazy, and I seemed to be smothering. I was in this condition for two or three years and could not seem to work. I tried all kinds of medicines and had been treated by physicians but received no benefit. I found one of your booklets and felt inclined to try Lydia E. Pinkham's Vegetable Compound. I received the best results from it and now I keep house and go out to work and am like a new woman. I have recommended your Vegetable Compound to my friends and if these facts will help some poor woman, use them as you please."—Mrs. J. F. PEASEY, 387 King St., West, Toronto, Ontario.

Various forms of female weakness many times make work almost impossible. Lydia E. Pinkham's Vegetable Compound has helped thousands of women over these troubles.

and in packages

Pure-Bred Goats

Registration of goats in Canada has increased 50 per cent. during the past year and keen interest in goat raising is being evinced by suburban dwellers. British Columbia has maintained its lead and now exports large numbers of these animals to other provinces of the Dominion. In order to encourage breeding the Dominion Livestock Commissioner has agreed to have pedigree placed on registration certificates that distinction can be made between pure-bred and scrub stock.

CHILDHOOD AILMENTS

The ailments of childhood—constipation, indigestion, colic, colds, etc.—can be quickly banished through the use of Baby's Own Tablets. They are a mild but thorough laxative which instantly regulate the bowels and sweeten the stomach. They are guaranteed to contain no harmful drugs and can be given to the youngest baby with perfect safety. Concerning them Mrs. Alcide Lepage, Ste. Beatrix, Que., writes:—"Baby's Own Tablets were of great help to my baby. They regulated her bowels and stomach and made her plump and well." The Tablets are sold by medicine dealers or by mail at 25c a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Population Possibilities

Only 2 1/2 People Per Square Mile in Canada

The United Kingdom has 394 people to the square mile. Canada has two and a half. The average for the Empire is a little less than six per square mile.

Outside of the United Kingdom, New Zealand shows the most dense population with 11.7 to the square mile. If Canada had even half the density of population which New Zealand has, it would give her 19,000,000, while Australia would have 16,000,000. The possibilities of increased population tend to show that eventually the centres of population and influence will shift from outside Great Britain to some of her overseas dominions.—From the Farmers' Sun.

Asthma Doesn't Wear Off Alone. Do not make the mistake of waiting for asthma to wear away by itself. While you are waiting the disease is surely gathering a stronger foothold and you live in danger of stronger and yet stronger attacks. Dr. J. D. Kellogg's Asthma Remedy taken early, will prevent incipient condition from becoming chronic and saves hours of awful suffering.

Very Trying

"Did I hear you say, guard, that the engine was at the rear end of the train?" asked an old lady of the guard.

"Yes, ma'am; we've got an engine at each end. It takes an extra one to push up the steep hills."

"Dear, dear; what shall I do? I'm always so ill if I ride with my back to the engine."

Ask for Minard's and take no other

Not Far

Old Lady.—Oh, captain, I'm so sick! How far are we from land?

Captain.—About four miles, lady.

Old Lady.—In what direction?

Captain (pointing).—Straight down.

Useful in Camp.—Explorers, surveyors, prospectors and hunters will find Dr. Thomas' Electric Oil very useful in camp. When the feet and legs are wet and cold it is well to rub them freely with the Oil and the result will be the prevention of pains in the muscles, and should a cut, or contusion, or sprain be sustained, nothing could be better as a dressing or lotion.

Archduke is a Translator

Leopold Making Use of Skill to Earn Living

Leopold Woelfing, formerly the Austrian Archduke Leopold, who applied for poor relief in Switzerland and did not obtain it, is living in a Vienna suburb, earning what he can by his skill as a translator.

He humorously explains that his income of 3,000 crowns a month, or less than fifty cents, would "hardly support a worm." He is a citizen of Regensdorf, in the Swiss canton of Zurich, but prefers to live in Vienna, though both Social Democrats and Monarchists regard him as "not one of us."

SPARKLING EYES

Follow Good Health

London, Ont.—"I have taken Dr. Pierce's Favorite Prescription and it has proved a beneficial tonic. After having typhoid fever I was in a very weakened condition, could not regain my strength, so I decided to take the 'Prescription' and by the time I had taken one bottle I was completely restored to health and strength. Dr. Pierce's Favorite Prescription can be relied upon as a builder and strengthening tonic."—Mrs. John Shuler, 225 Clarence St.

IF YOU'RE A YOUNG WOMAN OR EVEN IN MIDDLE LIFE

Here is Some Good Advice for You From a Prominent Woman

London, Ont.—"When I reached middle age I was in very poor health, was rundown, nervous, would have fainting spells and heat flashes, I was a physical wreck. I tried many different medicines but the only medicine that gave me any relief was Dr. Pierce's Favorite Prescription. Before I had taken a half bottle I was feeling like a different person—the more I took the stronger I got. What 'Favorite Prescription' did for me I am sure it will do for other women at this critical period of life if they will give it a fair trial."—Mrs. M. M. Taylor, 569 Hill St.

Better go now to your neighborhood drug store and obtain Dr. Pierce's Favorite Prescription in tablets or liquid. Write Dr. Pierce's Invalids' Hotel, Buffalo, N. Y., for free medical advice, or send 10c for trial pkg. of tablets to Dr. Pierce's Laboratory in Bridgeburg, Ont.

Exceptional Opportunities Exist In Canada For Engaging In Poultry Raising

Exceptional opportunities exist in Canada today for engaging in the agricultural or commercial activities of poultry raising and egg marketing. In this respect Canada faces a peculiar situation for whilst, at the present time she is exporting eggs to foreign countries at the rate of about six and a half million dozen annually, she is importing for domestic consumption, nearly five and a half million dozen.

It is only of recent years, since Canada has diversified the larger issues of grain growing and livestock raising with lesser, though no less necessary, agricultural pursuits, that poultry raising has been entered into on what might be considered the proportions of an important industry. This interest in poultry raising has been fostered and encouraged in every way by government campaign and propaganda and has resulted in a gratifying increase in the number of poultry and the production of eggs. Whilst Canada has been successfully asserting herself as a serious competitor amongst the dairy countries of the world, she has also been developing in a surprising manner as an egg marketing nation. Though her progress in egg production has been little short of remarkable, the export trade, from popular demand, has increased in like proportion yet she continues to send out practically the same amount as she is under the necessity of importing for her own use.

It is only within the past few years that Canada has managed to obtain a lead, small as it is, in egg exports over imports, due to phenomenal development in the home industry. Since 1909 Canada had the unenviable position of importing each year more eggs than were exported. Total exports in 1911, for instance were 92,164 dozen against imports of 2,378,640 dozen. In 1915 exports amounted to 965,640 dozen only against 4,354,611 dozen. By 1918 the tide had turned and exports were 4,896,993 dozen against 4,274,452 dozen. The favorable trend has continued due to activity in the promotion of the industry at home and in 1921, exports were 6,579,853 dozen against imports of 5,341,611 dozen.

The Bureau of Statistics reports that there were 34,340,474 hens in Canada in 1921 as against 25,942,105 in 1920. During 1921 these hens were responsible for a production of, as near as can be estimated, 161,971,000 dozen eggs as compared with the previous year's production of 121,604,000 dozen.

Poultry farming has long been popular and profitable in Canada especially in the Maritime Provinces and British Columbia, but the increase in recent years has been brought about by the adoption on a greater and wider scale of poultry raising by mixed farmers and those following agricultural pursuits of other natures who have found this branch increasingly profitable and returning quick and steady revenues. In this regard it is significant that Saskatchewan, the first wheat province, is, in proportion to its population, the first poultry province of Canada with 9,000,000 hens, followed closely by Ontario. It is equally significant that Alberta, another prairie province, takes third place and that Manitoba, the third of the trio, is bracketed fourth with Quebec.

The opportunities lying in the poultry industry in Canada are self-evident from a survey of the facts. The export trade is developing to a larger extent each year as the popularity of the Canadian produce increases and the demand is greater. In the decade 1911-1921 export in eggs has grown from 92,164 dozen to 6,579,853 dozen. Despite the tremendous increase in production practically an equal amount has to be imported to fill domestic needs. Room exists for wide expansion in production.

No System There

"There's one job no system expert will ever be able to control."

"What's that?"

"House cleaning. No woman would ever think she was doing the job unless every room in the house were upset at the same time."—Detroit Free Press.

W. N. U. 1421

Railroads Pay Theft Losses

Enormous Sums Required Each Year to Reimburse Public

It was stated the other day in the newspapers that within a period of three years six million dollars' worth of goods had been stolen from the New York Central Railroad. This brings up the question of the enormous losses that are entailed every year from like causes. In a booklet of U.S. railway statistics before me is noted the fact that in the year 1917 the American railways paid out the sum of \$44,000,000 for loss and damage to freight, baggage, property and livestock. In the year 1920 the total losses and damage bill was \$142,000,000. In neither case are injuries to persons taken into account. This is another bill which in 1920 amounted to \$57,000,000.

These figures demonstrate two things, first that the railways are not receiving the faithful and vigilant service of their employees, and secondly, that the public had to pay the freight, so to speak.

While the railway statistician who compiled this book does not in so many words and figures divide the thefts from other losses, it is none the less plain that thefts formed a very large proportion of the whole. In this connection, Canadian railway managers could, if they would, unfold an equally startling array of figures, and these could be readily backed up by the experience of most any large client of our transportation systems. From the Toronto Saturday Night.

Enthusiastic About Canada

Sir Julian Orde Says Dominion Has Great Future

"Throughout the whole of my tour through Canada from east to west, I did not discover what I should term a distinctively Canadian automobile."

In these words, Sir Julian Orde, Secretary of the Royal Automobile Club, and a leading authority in Britain on the automobile industry, summed up an important aspect of the journey that has taken him half-way around the world, and from which he has just returned.

Sir Julian is enthusiastic about Canada's paved roads in the vicinity of large cities, which he declared were second to none, but he was not very favorably impressed with prairie highways. He returns home convinced in his opinion that if Canada is given the right kind of immigrants, she has a future in store for her such as no country has ever had in prospect before in its history.

"There are prospects of an era of prosperity in the Dominion far exceeding those of the United States, in my opinion," said Sir Julian. "The great need of the Dominion today is men and more men, and so soon as she begins to acquire greater population, she will hold out opportunities to new settlers such as no country can rival. Canada is fully capable of taking care of a very large influx of the right kind of settlers."

New British Plane Has Two Decks

Fighting Bomber Equipped With 1,000 Horsepower Engine

To go "upstairs" in an airplane in flight will be possible in a machine just completed for the British authorities, which has been designed to take the first of the 1,000 horsepower "Club" engines.

This airplane, about to undergo an expert official test at Martlesham Heath, is built so that it has two decks, or floors, one above the other. On the "ground floor" there is all the elaborate release-gearing and instruments for the accurate dropping of large bombs—the machine being in fact, a fighting bomber with an exceptionally wide radius of action.

On the "first floor" communicating with that below, will be accommodated the pilot and navigator of the machine, who have an admirable view on all sides.

The word "admiral" is derived from the Arabic, emir-al-bahr, meaning "lord of the sea."

Repentance is much more than being sorry that you sinned.

Egg Laying Contest

Reported that this Year's Saskatchewan Contest is a Splendid One

The performance of the 10 pens entered in the Saskatchewan egg laying contest, conducted by the officials at the Indian Head Experimental Farm, up to and including the week ending May 1, shows pen No. 3, entered by the Experimental Farm, leading pen No. 2 by a margin of 36 eggs in 26 weeks. The two pens are white wyandottes and both listed as sick during the last week.

The Experimental Farm pens are entered for record of competition only, and will not compete for prizes. Superintendent MacKenzie and A. M. Pilkey, manager of the contest, report this year's performance a splendid one, with an apparent increased laying ability in the pens entered.

Following is a list of the pens and the owners:

- 1—J. G. Lewthwaite, Rosthern; sick; white wyandottes.
- 2—Experimental Farm, Indian Head; sick; white wyandottes.
- 3—Experimental Farm, Indian Head; sick; white wyandottes.
- 4—Experimental Farm, Indian Head; sick; white wyandottes.
- 5—Experimental Farm, Indian Head; sick; white wyandottes.
- 6—A. Finch, Battleford; sick; white wyandottes.
- 7—W. W. Smith, Battleford; sick; barred rocks.
- 8—S. W. Exley, Conquest; sick; white orpingtons.
- 9—O. A. Walters, Grenfell; sick; single comb Rhode Island reds.
- 10—T. Gibbs, Moose Jaw; sick; single comb white leghorns.
- 11—T. Gibbs, Moose Jaw; sick; single comb black leghorns.
- 12—A. W. Vann, Indian Head; sick; white wyandottes.
- 13—Mrs. J. J. Dane, Heward; sick; rose comb Rhode Island reds.
- 14—R. Morley, Moose Jaw; sick; single comb anconas.
- 15—S. H. Jones, Blaine Lake; sick; barred rocks.
- 16—Major M. Shoul, Zelma; sick; barred rocks.
- 17—E. Barnett, Radisson; sick; white wyandottes.
- 18—Mrs. Alfred Wilson, Lashburn; barred rocks.

Charles Dickens insisted on his bed being placed north and south, and it is said that he carried a compass in his baggage.

The heart cannot soar high without love. People with little love in their natures are frequently grovelers.

American Pays Tribute To The Efficiency Of Britain's Great Police System

Conditions Growing Better

World is Recovering Slowly from Effects of War

Conditions in the world are not growing worse. They are growing better. Recovery from the effects of the war is progressing. The evils to be attacked are steadily becoming less important, and the very fact that they are being attacked is a great step toward correcting them. Political conditions the world over are growing perceptibly saner and sounder. Business is responding with greater activity. Confidence is justifiably increasing. The number of unemployed is diminishing in this country, at least, and probably in all others. Experience is teaching men the solution of their problems and false steps, when made, are producing less serious results than was the case last year and the year before that and the year before that—Buffalo Express.

Railway Using Lazy Man's Invention

Switchman Conceived Idea of Operating Signals From House

Few things are wholly bad. Laziness is not an admirable trait in any man, but for all that it appears to have been responsible for at least one useful and important invention. In 1846, says Mr. Herbert W. Horwill in *Discovery*, a railway switchman who had to attend to two station signals some distance apart decided to save himself the trouble of walking to and from between them by fastening the two levers together with a long piece of wire. He used a broken chair as a counterweight and ran the wire on into his hut. Each night after that he sat by his fireside and worked the two signals without setting foot outside.

Presently the railway authorities found out what he had done, reprimanded him for his indolence, promoted and rewarded him for his ingenuity and then adopted his invention.—Youth Companion.

The lower story of a house in Kansas City, Kan., is built entirely of discarded telephone and telegraph poles.

An illuminating close-up of the workings of Scotland Yard, London's great police system, especially during the war, is given by the following incident related by Robert J. Thompson, an American writer, in the *Dearborn Independent*.

Back in 1908 Mr. Thompson paid a visit to the Museum of Crime in Scotland Yard, had his finger prints taken in the ordinary criminal way, and carried away a copy of the impression.

The other day he called at the headquarters of Scotland Yard and asked to see the chief of the criminal identification bureau. On being asked his name and the nature of his business he took out the souvenir copy of his finger prints of 1908, with all the identification memoranda (except the date) removed and handed it, with nothing else, to the messenger, saying: "Here's my card and I will tell the chief himself the nature of my business."

He waited three-quarters of an hour for the messenger to return. Then, in his own words:

I was led to an office where a keen-eyed and pleasant-faced man sat at a big desk and greeted me with a wave of his hand. Looking up and, speaking slowly, he said: "Take a chair, Mr. Thompson, and tell me what we can do for you. I see by your dossier that you are no longer in the American consular service. That you resigned in 1915. That you wrote a book on the war—in the early days of the conflict. That you passed through our 'Intelligence' lines from Tilbury Docks to Holland in May, 1915, with a special journalistic commission from the Chicago Tribune and the London Times. That you became ill at The Hague. That you spent the winter of 1915-16 in Berlin, and that you went to Switzerland to recuperate and stayed there until after the close of the war. Now, again, what can we do for you? It is further observed that you were introduced here in 1908 by a Dr. Clark, of New York."

"Well," I responded, "what can you do for me? You have already done it! Three-quarters of an hour ago not a soul about the place knew my name nor who I was, or where I came from. I must say that the thing works perfectly and it is too bad, I am sure, that I am not a criminal, and that I was not a German agent."

"Capital!" he said, "we knew you were not, and by two incidents which occurred in the winter of 1915 and 1916. Shall I tell you what they were?"

"Go ahead," I answered.

"Very well! Here you are," looking the meanwhile at some memoranda on his desk. "At a meeting of a committee of so-called Americans (the proceedings were carried on solely in German) at the German Authors' Club on November 15, 1915, in Berlin, you declined peremptorily to go on the platform and make an address with Sir Roger Casement. You further refused to make any public discourse whatever without first consulting your ambassador, Mr. Gerard, and submitting a copy of your speech to him for censorship. And in February, 1916, you repulsed with proper spirit (for the proposal was made by one of our own men), a suggestion that you accept a large fee—a very large fee—to go to Washington on a secret mission for the German chancellor, Von Bethmann Hollweg. Your voluntary and spontaneous action at the German Authors' Club in the one instance, and your response to our test in connection with the Von Bethmann Hollweg offer, were sufficient for us, and, after that, we left you alone."

Here was I, continues Mr. Thompson, a business man by occupation and a dilettante journalist when opportunity offered, drifting into Scotland Yard to get some color and statistics to divert myself by writing something on this greatest of police and detective institutions in the world—to talk to someone about Sherlock Holmes, Jack the Ripper, Raffles, the gentleman burglar, and so on, when I come up against the real thing by a stumbling instinctive interest in a simple attempt to test the finger print identification work of Scotland Yard.

Do You Know a Sunfish When You See It?

THE sunfish is a member of the Globefish family, and Pinzie learned this after his wonderful play and rest among the rocks that had been uncovered by the low tide. . . . when he learned all about everything concerning Hermit Crabs. What a good time he had had! He hated the mere thought of leaving the place, and yet he had to, because at last the tide was coming in—which, as you know, it does every twelve hours, just as it goes out again after the same lapse of time. So, tide coming in and Pinzie perforce going out, he naturally was on the look out for new things to learn about. He had watched Hermit Crabs until he really was tired, and that is unusual for any Brownie. He had seen them fight about nothing (which they are always more than anxious and willing to do), and he had seen them battle about the homes they lived in, had lived in or were wanting to live in. Such fights! He had seen some of them terribly wounded and torn in half, while the victors triumphantly took possession of the empty shell; and he had seen other things, too! And one of them reminded him of once when he had been on Fifth Avenue, in New York City, and when looking in a shop window had beheld a Japanese screen that had been so beautifully painted and landscaped that for a moment as he gazed at it he almost thought himself beyond the city limits and far away near the ocean. In any case, he wished himself there, and thought of fields and birds and flowers and waters and fish and reeds.

Can you guess what he saw?

He was leaning against some rocks overlooking a patch of water which the sun directly struck, and right there, where he could so distinctly see them, a whole school of Sunfish were lazily basking and swimming in the sun warmed waters. They went around and around, none of them hurrying and none of them lagging behind the others; and Pinzie, who in spite of being full of mischief is just as full of love of the unusual and beautiful, could hardly breathe; he was far too busy looking! It was almost exactly like the design on the beautiful Japanese screen that he remembered.

When thinking of Sunfish we are very apt to make mistakes. We order Sunfish from the fish dealers when we should say Panfish. A real Sunfish is almost round in shape and has two long and pointed hand-like fins toward the end of its body. It gleams and shines with phosphorus by night, and for this reason is often called Headfish and Moonfish. It is not very good to eat, and the Panfish that we wrongfully call Sunfish are delicious and much in demand.

Have you ever heard of a Toadfish? Next week's story will tell you about it.

Copyright, 1922.

Select The Hague As Meeting Place To Discuss Russian Question

Genoa.—The Hague has been definitely selected as the meeting place for the experts who will further examine the Russia problem. Arrangements for The Hague conference in June were practically completed with the acceptance by the Russians of the proposals submitted to them, which have been amended so as to provide that a truce between the various powers will continue for a maximum of eight months.

The process verbal relating to the Lloyd George plan for dual commissions to meet at The Hague, which was presented to the Russians was adopted with an annex. With the amendments carried by the sub-commission, it will be sent to the Washington Government probably with a letter from the secretary of the Genoa conference.

Clause 6 of the annex to the process verbal, which refers to the truce or preliminary pact of non-aggression, was amended in such a manner as to make it clear that the truce, as well as applying to the Russian Government proper, will apply also to the eight republics allied with Russia. This would bring in the Far Eastern Republic, with which Japan has been vainly trying to conclude a general treaty.

The Japanese delegation accepted this amendment with the understanding that it must be ratified by the Japanese Government.

A second important amendment to the document provides that the truce will continue to operate for a period of four months after adjournment of The Hague meeting. As it had been previously understood that The Hague conference would last about four months, this change is interpreted as indicating a probable European and

Asiatic truce of about eight months. This extension is also considered a victory for Mr. Lloyd George because it provides more time for the consummation of the permanent non-aggression pact into which he hopes the truce will be merged.

League Will Consider Mandate for Palestine

Meeting to be Held Not Later than July 15

Geneva.—The Council of the League of Nations decided to hold a special meeting not later than July 15 to consider the question of approving the British mandate for Palestine. Lord Balfour in a speech before the council, said Great Britain was greatly disappointed that the present session had failed to register the League's consent to the terms of the mandate, which the allied powers had long ago agreed upon. Lord Balfour pointed out to the council members that their refusal to consider the mandate did not mean that the allied policy regarding mandates was endangered. The council could not change the decision of the allies on the mandate he reminded the members.

Expect Reduced Total Acreage in Wheat

Saskatchewan Will Suffer Most According to Weekly Crop Report

Winnipeg.—From present indications we anticipate a somewhat reduced total acreage in wheat this year," stated the weekly crop report of the Grain Trade News issued here.

"While Saskatchewan will perhaps suffer from an acreage reduction of from 8 to 12 per cent., Alberta and Manitoba may both be expected to have made a gain of from five to 10 per cent.," the report continues. If last year's figures of wheat acreage estimated by the Dominion Bureau of Statistics are taken then the acreage for the two years might compare somewhat as follows in round figures: Manitoba—1921, 3,500,000; probable 1922, 3,750,000. Saskatchewan—1921, 13,500,000; probable 1922, 12,000,000. Alberta—1921, 5,120,000; probable 1922, 5,500,000. Total—1921, 22,120,000; probable 1922, total, 25,000,000.

Further Message to U.S.

Paris.—The Havas correspondent at Genoa understands that Premier Lloyd George has sent another message to the United States Government giving a fuller explanation of the plan for the meeting of the experts commission at The Hague.

Vesuvius is Active

Naples.—The volcano Vesuvius is in eruption with renewed violence, emitting large quantities of lava and clouds of dense vapor. It is not thought the present eruption will endanger the surrounding territory.

WESTERN EDITORS

A. L. Eastley, Editor of The Sentinel, Sedgewick, Alberta.

British Settlers for B.C.

Victoria.—Sir William Beach Thomas, noted war correspondent of the Daily Mail of London, has arrived here to spy out the land on Vancouver Island for the settlement of agriculturists, who, it is proposed will emigrate from the British Isles.

Sir William was sent out by Lord Northcliffe as a result of what the latter learned of Canada during his tour last year.

COULDN'T DO HOUSEWORK, HEART WAS SO BAD

Many women get weak and run down and unable to look after their household duties owing to the heart action becoming impaired or the nervous system unstrung.

Nature intended women to be strong, healthy and happy instead of sick and wretched. But how can a woman be strong and healthy when day in and day out she has to go through the same routine of work, sweeping, dusting, cooking, washing, etc. Is it any wonder that the heart becomes affected and she gets irritable and nervous, has hot flushes, faint and dizzy spells, smothering and sinking spells and can't sleep at night.

To all women whose heart is weak and whose nerves are unstrung we would recommend

MILBURN'S

HEART AND NERVE PILLS

as the best remedy to tone up the system and strengthen the weakened organs.

Mrs. Daniel Bezanson, Loganville, N.S., writes:—"As I was troubled with a weak heart for nearly two years I am writing to tell you what your great remedy, Milburn's Heart and Nerve Pills, has done for me.

My heart was so bad at night I could not sleep, I would take smothering spells, and was so weak I could not do my housework. I tried two doctors, but got no results. A friend advised me to try your pills. I used six boxes and am completely relieved. I think they are the best remedy for heart trouble there is."

Price, 50c a box at all dealers, or mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

A Monster Memorial

To Inscribe Names of Missing Canadians on Vimy Ridge Monument

Toronto.—Major-Gen. S. C. Mewburn, Hamilton, former Minister of Militia, addressed delegates to the joint conference of the Canadian and Ontario Dental Associations here at luncheon. He reviewed the work of the Canadian Army Dental Corps from 1914 throughout the war and praised the care and treatment they gave the Canadian soldiers. Speaking as chairman of the War Graves Commission, General Mewburn said that the names of 19,000 missing Canadian soldiers would be inscribed in bronze on the memorial to be erected at Vimy Ridge, the base of which monument would cover an acre of ground.

The monster memorial, General Mewburn said, would probably be visible for a distance of 15 to 20 miles. It was designed by W. S. Allward, the Toronto sculptor. The site had not been fixed up yet the General said.

Drumheller Mines May Re-open

Calgary.—Mine operators of the Drumheller Valley say coal mines will re-open June 15, according to a special dispatch received here. Meantime, however, everyone is awaiting announcement of a decision by the conciliation board, which now stands adjourned.

W. N. U. 1421

Hon. T. A. Crerar Favors Placing Settlers Along National Railways

Ottawa.—Discussion of railway estimates in the House brought from Hon. T. A. Crerar, leader of the National Progressives, an important declaration of his policy on the national roads. He advocated the closing down of part of the trans-continental lines running across the wilderness between Eastern and Western Canada. He urged a revaluation of the entire system on a replacement basis and its unification. He favored and suggested regional districts. He took the ground that, in encouraging immigration, the Government should take steps to see that the new settlers were placed along the national lines.

It was too, Mr. Crerar argued, a sound principle that the fiscal policy of the country should be so drafted as to stimulate production from the farm, the forest and the mine and railway traffic would thereby be encouraged.

"If the National railways are turned over to private ownership at any price which private ownership would pay, the country would forever lose

their potential value, but would not escape the liabilities involved," Mr. Crerar declared.

Mr. Crerar's speech came at the close of an afternoon's discussion on the railway estimates, a discussion which would be continued.

Earlier, Hon. Walter Mitchell, Liberal member for St. Antoine and formerly one of Sir Lomer Gouin's lieutenants in the Provincial Government of Quebec, had defended private ownership of railways. Mr. Mitchell went further; he expressed opposition to the principle of public ownership and operation of all public utilities.

"I have come to the conclusion on general principle," Mr. Mitchell asserted, "that the public pay more under public ownership than they benefit from lower charges."

Right Hon. Arthur Meighen, leader of the opposition, charged in reply that Mr. Mitchell had no case. As the national lines had not been constructed as commercial propositions, no private company could make them pay.

Casgrain Says Canal Would Increase Rates

Ocean Vessels Would Not Compete With Low Charges

Ottawa.—Resuming his speech on the St. Lawrence ship canal in the Senate, Senator Casgrain declared that its construction instead of cheapening rates would increase them. On May 5 the rate on wheat from Port Arthur to Montreal including all charges, was less than 7 cents per bushel, while the average rate per bushel from 1910 to 1915 from Port Arthur to Liverpool, including all charges was 10.73 cents. No ocean vessel would ever enter the great lakes and compete with that port.

A ten-thousand-ton tramp steamer costs \$800 per day to operate, and it would take fifty days for a return voyage from Liverpool to Duluth, or a total cost of \$40,000. Such a ship would carry only two hundred thousand bushels of grain at 11 cents per bushel, which would mean a net loss of \$18,000 dollars. Lake carriers could handle five hundred thousand bushels of grain on an average. They could come down with ore and grain to the lower lakes and get a complete cargo of coal back. They could make the return voyage in ten days with a revenue of \$11,000.

Lose Show Horses in Fire

Oakville, Ont.—Twenty-eight or thirty show horses, hunters, belonging to H. C. Cox and Sir Adam Beck, were burned to death when the arena in which Hugh Wilson trains the horses was burned to the ground. The arena probably cost \$25,000.

Unemployment in B.C. Decreasing

Victoria, B.C.—Unemployment throughout British Columbia has decreased so rapidly that in some parts of the province it has practically disappeared altogether.

Provincial employment officers in their reports to the Department of Labor, state they are now placing men much more freely than before. Improved weather conditions are given as partly the cause.

Chinese Delegation Leaves Tokio

Tokio.—The entire staff of the Chinese delegation here left Tokio without notifying the Foreign Office, declaring that their departure was due to the failure of Peking to supply funds for Chinese students here and the refusal of Japanese banks to make further advances on the ground of lack of security.

USEFUL FOR OVER 500 PURPOSES

Gillett's Lye can be used for so many purposes that their enumeration here would be impossible. For example, Gillett's Lye can be used for making soap, in washing dishes, also as a disinfectant. For softening hard water. As a means of removing grease and smoke stains. These are only a few of its many uses, but they serve to indicate what has made Gillett's Lye such a general household utility to-day.

Decline Substitutes.

Made in Canada.

WORLD HAPPENINGS
BRIEFLY TOLD

The United States Red Cross, after eight years of work, during which it expended more than \$400,000,000, will close its main activities in Europe at the end of June.

The Galteemore Creamery in Tipperary has been burned. It was one of those taken over from the owners, the Cleaves Bros., by the workers, who hoisted a red flag over it.

Finn Malmgren, a young Swedish scientist, is leaving for Seattle, Wash., to join the Amundsen North Polar expedition, according to a Reuter despatch from Christiania, Norway.

The economic treaty between Poland and Germany settling the Upper Silesian question between the two nations, was signed in the presence of the Council of the League of Nations and many other interested spectators.

The Grandview Branch of the Royal Bank, Napier Street and Commercial Drive, was held up by three armed men and robbed of \$1,000 or \$1,500 in cash. The men escaped in an automobile.

The crews of four German steamers, which for weeks were icebound in the Gulf of Riga, were supplied regularly with fresh bread by Latvian military aviators. Fishermen reported the vessels running short of provisions and airmen from Riga made trips every few days carrying food for the sailors, the bread being dropped in sacks on the ice near the huddled in steamers.

Crop Report Shows Increased Acreage

According to the first season's crop report of the Canadian Pacific Railway the total acreage prepared for seeding in the three prairie provinces is 16,468,548 as compared with 12,785,750 in 1921, an increase of nearly 29 per cent. Manitoba has an increase of 14 per cent. in both summerfallow and fall ploughing; Saskatchewan an increase of 12 per cent. in new breaking and 93 per cent. in summerfallow; Alberta shows an increase of 6½ per cent. in new breaking and 24 per cent. in summerfallow.

If Tormented With Corns,
Use Good Old "Putnam's"

It's really a simple thing to remove your corns, and without pain, if you apply Putnam's Painless Corn Extractor. It acts like magic, lifts out the corn, root and branch, leaves the skin smooth as silk. No failure with "Putnam's," 25c everywhere.

Past Winter Good for Trappers

According to the mail received from the far north the past winter has proven a most successful one to the Indians and Eskimo trappers, and good catches of furs are reported. Bounding prosperity in the far north-land is the keynote of all advices received.

Quito, capital of Ecuador, is the only city in the world located on the equator.

A Tribute to Lloyd George

American Paper Commends His Work at Genoa Conference

Though the French extremists of the Andre Tardieu type may hold that his own words justify all their fulminations and all their charges against him; though they may think they have found new reasons to complain of the measure of support he has given French ideas and plans, the world at large will commend the British Premier's endeavors, and will see in the Genoa conference something more than a last desperate effort to save a bad situation. They will recognize it as an endeavor to realize on a carefully conceived and nurtured plan for the reconstruction of Europe; and whether Lloyd George fails or succeeds in his design, he will stand the higher in the estimation of men for what he has done.—Detroit Free Press.

EVERY WOMAN
IN POOR HEALTH

Has an awful struggle. Lots to do, all kinds of worry, poor appetite, headaches, weakness. Her one desire is for more strength and better health. What sickly worn out women need is a cleansing, blood purifying remedy like Dr. Hamilton's Pills. This wonderful medicine clears out the wastes from the system, regulates the bowels, helps the blood. To look your best, to feel fit and fine all day, to be free from lassitude and headache, use Dr. Hamilton's Pills regularly. 25c at all dealers or The Catharhzone Co., Montreal.

Rules for Feeding Dairy Cattle

Sudden Changes in Feeds Liable to Cause Loss in Gains or Production

The Dominion Animal Husbandman sets down in No. 68 of the Experimental Farm circulars three very concise and explicit rules for feeding dairy cattle. The first is: Never overfeed; the second, Feed according to the individual needs and desires of each animal; and the third, Feed regularly both as to the hours of feeding and the character of the feeds. Relative to the last, the Animal Husbandman points out that sudden changes in feeds are liable to cause not only a loss in gains or production, but will often induce ailments such as diarrhoea, bloat, milk fever, etc., all of which are described in the circular with suggested treatment and remedies.

Nation-wide Fame—There is scarcely a corner of this great Dominion where the merits of Dr. Thomas' Electric Oil have not been tried and proved. It is one of the world's most efficient remedies for sore throat, lame back and many other ailments arising from inflammation. Rubbed on the skin its healing power is readily absorbed, and it can also be taken internally.

Seeing Good in Everyone

We may, if we chose make the worst of one another. Every person has his weak points; every one has his faults; we may make the worst of these; we may fix our attention constantly upon these. But we may also make the best of one another. We may forgive, even as we hope to be forgiven. We may put ourselves in the place of others and ask what we should wish to be done to us and thought of us in their place. By loving whatever is lovable in those around us, love will flow back from them to us and will become like Heaven; and we shall become not unworthy followers of Him whose Eternal name is Love!—Dean Stanley.

Fur Farming

Sanitation and Cleanliness Are Essential for Success

In my last letter I told of the possibilities of fur farming and why it should be profitable in the west. I will now try to tell you how it should be carried on to have the greatest increase in your stock.

There are some very important things to consider in fur farming and the most essential are to get the very best stock to start with. Another is proper feeding and still another is the sanitary problems of your ranch, which if neglected mean failure to produce the kind of animal that brings the highest market price.

Wild animals in captivity are not subject to many diseases if sanitation is strictly enforced. To do this one must start early in the spring or as soon as it is advisable to go into the ranch and keep everything scrupulously clean in the pens and houses, and if the houses are sprayed once a week with creolin, using a fine spray, fleas will be kept away and you will not have to use anything on your animals. All feeding dishes should be first washed in clean water and then boiled and set in the sun until again used, and every dish used in preparing the food should be treated the same after it is used so that nothing will become tainted in the least. All food that is carried over from one meal to another should be protected from flies, etc., either by screens or in a cooler, and food should be fed as fresh as it is possible to procure it. It is true that some animals will eat food that has gone bad, but it is just as true that this food is not good for them and will sooner or later cause trouble. It is better to feed milk in the evening after the weather becomes hot and muggy, as it does not sour as quickly in the cool of the evening as it does in the sun of the day.—W. G. Church, Inspector.

U.S. Settlers for Peace River

A large volume of agricultural settlers from Wyoming to the Peace River country is expected this summer, and recently the vanguard of twenty-five families from that State arrived. Francis James, a prominent Wyoming rancher, states that big tracts of land are to be taken up in the area for ranching purposes.

Giant Telescope Almost Completed

After nearly a year's labor the ten-ton telescope being built by T. S. H. Sherman at Vancouver for C. H. Fryre, of Seattle, is nearing completion. The glass is ten feet in diameter and it is estimated that the instrument will make visible four hundred million stars.

HOW'S THIS?

HALL'S CATARRH MEDICINE will do what we claim for it—rid your system of Catarrh or Deafness caused by catarrh. We do not recommend it for any other disease.

HALL'S CATARRH MEDICINE is a liquid, taken internally, and acts through the blood upon the mucous surfaces of the system, thus reducing the inflammation and assisting Nature in restoring normal conditions. Circulars free. All Druggists. Circulars free. F. J. Cheney & Co., Toledo, Ohio.

New truth is found not by kicking at the old but by using it as a foundation.

There is no poisonous ingredient in Holloway's Corn Remover, and it can be used without danger or injury.

Meat Dishes Rare in Greece

In Greece there are hundreds of families who never taste meat during the entire year except on New Year's Day and at Easter.

RHEUMATIC TREATMENT

This Trouble Can Only be Got Rid of by Enriching the Blood

In no disease does the blood become thin so rapidly as in rheumatism. Not only does it become thin, but it is loaded with rheumatic poisons. Without proper treatment these poisons increase, the general health is undermined, the inflamed joints swell, and are very painful, and often the sufferer becomes crippled.

Dr. Williams' Pink Pills build up the blood and enable it to cast out the rheumatic poisons with the natural secretions of the body, thus driving out the pains and benefitting the general health. Sound proof of these statements is offered by Mrs. George Stanley, Sparta, Ont., who says:—"For a number of years I was troubled with rheumatism, which at times was very painful. My general health was also affected, and I could scarcely drag myself around. I had been doctoring a good deal, but did not get any better, until one day my daughter brought me a box of Dr. Williams' Pink Pills. By the time these were used I could notice a slight improvement, and I continued taking the pills until I had used about a dozen boxes, by which time I felt like a new person—and looked like one. I could do my work with ease, and have since enjoyed the best of health. I have since recommended Dr. Williams' Pink Pills to several others who received the same benefit as myself."

The best time to begin taking Dr. Williams' Pink Pills is the moment you feel the least bit out of sorts. The sooner you do so the sooner you will regain your old-time energy. You can get these pills through any medicine dealer or by mail postpaid at 50 cents a box or six boxes for \$2.50 from The Dr. Williams' Medicine Co., Brockville, Ont.

Women represent nearly 40 per cent. of all the bank depositors in the United States.

CARBON WIN FROM GAMBLE

Carbon defeated Gamble on the latter's diamond, Wednesday evening to the score 5-6. Unfortunately the game was late in getting started and it was dusk when the two last innings were being played. Buffin pitched a good game, and also connected for a home run.

The Carbon line-up was as follows:

Hart, Catcher
Buffin, Pitcher
Paulson, 1st Base
Brushman, 2nd Base
Peters, 3rd Base
Knight, S. Stop
McLean, R. Field
Copeland, C.
Reid, L.
Umpire H. Hoding.

The Carbon Golf Club are putting considerably work on their course which will mean the expenditure of money. All players as well as prospective members are earnestly requested to secure their membership card from the Secy. Treas. Rev. D. E. Hattie at once. The membership fee is \$2.00 for gentlemen and \$1.00 for ladies.

Remember the Board of Trade regular meeting Friday evening June 9th.

Get away from that desk for a while; forget the dancants and roof garden parties--come with me to the Farmer's Exchange Hall and see the new Paramount Picture, "Don't Tell Everything," which will be shown on Sat. June 3rd. If you are interested in personalities, know that Wallace Reid, Gloria Swanson, and Elliott Dexter are all in it, with Dorothy Cumming and others in support. But further, it's a picture with real red-blooded action, delicious comedy, honest-to-goodness people and the spirit of the pine woods and the mountain heights.

The story is about a town girl and a woodsey girl--a sportive young man and his philosophical friend. They are all entangled in a love situation which results in mix-ups that keeps the spectator wondering how it can come out right.

DRAYING: for \$1.00 per load.
